## **DETAILED ACTION**

### **Restriction/Election Requirement**

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

- I. Claims 1-8 and 10-18, drawn to an apparatus for searching for a base sequence.
- II. Claim 9, drawn to a method for searching for a base sequence.

The inventions listed as Groups I-II do not relate to a single inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reason:

The technical feature that links the two groups is the method steps of searching a sequence. However, the method steps are not novel because they are taught by Yamada et al. (IDS document: Bioinformatics, advance access published Nov. 25, 2004). Such disclosure renders claim 9 not novel. Thus, the technical feature of the method steps is not special and the groups are not so linked under PCT Rule 13.1.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
